

RITISH SAINI

Backend Developer | Python Developer | FastAPI

+1 (510) 894-9093
ritishsaini1995@gmail.com

LinkedIn: [Ritish Saini](#)
Fremont, California

SUMMARY

Backend Developer with experience building scalable APIs, multi-tenant systems, and async backend workflows that improve performance, reliability, and search efficiency. Strong in Python, FastAPI, PostgreSQL, SQLAlchemy, Redis, Elasticsearch, and Celery.

EDUCATION

B.Tech in Computer Science Engineering

Chitkara University, India | 2022 – 2026
CGPA: 9.02

Senior Secondary (CBSE)

Cambridge International School | 2020 – 2022
CGPA: 9.30

SKILLS

- Languages: Python, SQL, Java.
- Backend: FastAPI, REST APIs, JWT Authentication.
- Databases: PostgreSQL, MongoDB, SQLAlchemy.
- Search & Caching: Elasticsearch, Redis
- Async Processing: Celery, Background Jobs.
- Tools & DevOps: Docker, Git, CI/CD, Sentry.
- Core Concepts: System Design, API Design, Database enhanced, Performance Tuning, Debugging.

CERTIFICATIONS

- AI for Scientific Research Specialization — Coursera
- IBM Deep Learning Professional Certificate — Coursera
- Introduction to Data Science & Scikit-Learn in Python — Coursera
- Machine Learning Models in Science — Coursera
- Software Product Management — University of Alberta (Coursera)

PROFESSIONAL EXPERIENCE

Backend Developer — Wizcommerce | Gurgaon | Apr 2025 – Present

- Built and optimized 30+ production REST APIs using FastAPI, improving data retrieval performance by 30%.
- Designed and implemented multi-tenant backend architecture, ensuring secure client-level data isolation and scalable support.
- Implemented Elasticsearch-based search, reducing query latency by ~40%.
- Implemented asynchronous background processing with Celery, offloading long-running tasks and improving overall system throughput and API responsiveness.
- Optimized PostgreSQL queries and SQLAlchemy operations, reducing database load by 25%.
- Enhanced system reliability through centralized logging, Sentry monitoring, and proactive error tracking for faster issue detection and resolution.

PROJECTS

Personal Portfolio Website: [link](#)

- Built a responsive personal portfolio in React.js to showcase projects and strengthen recruiter visibility.
- Improved cross-device usability with a clean, mobile-friendly layout and performance-focused UI structure.

[Quiz-Website : link](#)

- Developed an AI-powered learning platform with JWT authentication, Google OAuth and role-based access control.
- Integrated Gemini 2.5 Pro to generate topic-based quiz questions and enhance user-created quizzes.
- Implemented gamification features including XP progression, levels, daily rewards, achievements, and unlockable themes.
- Built scalable REST APIs and MongoDB data models for quiz management, user progress tracking, analytics, and personalized recommendations.
- Deployed the application on Render, enabling secure user sessions and AI-driven quiz experiences.
